

# Translator Web Guide

## ©2022 IT-TUN

### Introduction

Translator Web offers a great integration with <https://mytranslator.online> an innovative web application

which automatically translates complex InDesign documents with a few clicks.

In this document we're going to guide you through the installation process of Translator, then we'll explain the basic configuration of the plugin and how to get the most of it!

### How to install:

Download the ZXP file and use ZXPInstaller ( <https://zxpinstaller.com/> ) or Anastasiy's Extension Manager ( <https://install.anastasiy.com/> ) and follow the instructions to install the plugin.

If for any reason the installation fails, you can change the extension of the downloaded archive to zip and extract it to one of the following folders:

#### For Windows users:

Win(x86): *C:\Program Files\Common Files\Adobe\CEP\extensions*

Win(x64): *C:\Program Files (x86)\Common Files\Adobe\CEP\extensions, and C:\Program Files\Common Files\Adobe\CEP\extensions*

#### For Mac users:

*/Library/Application Support/Adobe/CEP/extensions*

After installing the extension, please follow these steps:

Know your CEP supported version:

Application	CC 2019	CC 2020	FY 2020	FY2021
InDesign	14 (CEP 9)	15 (CEP 9)	16.0 (CEP 10)	16.3(CEP 11)

For windows users:

Download the corresponding file to your installed product

[https://drive.google.com/open?id=1QVVSX\\_AMOKu9f-9d\\_TSC118V5q5jqAZTI](https://drive.google.com/open?id=1QVVSX_AMOKu9f-9d_TSC118V5q5jqAZTI)

For example, if you're using Adobe InDesign 2018, download Debug Mode ON CEP 8.reg and execute it and that should be all!

For Mac users:

Execute one of the following commands depending on your CEP version:

Version	command
CEP 7	defaults write com.adobe.CSXS.7 PlayerDebugMode 1
CEP 8	defaults write com.adobe.CSXS.8 PlayerDebugMode 1
CEP 9	defaults write com.adobe.CSXS.9 PlayerDebugMode 1
CEP 10	defaults write com.adobe.CSXS.10 PlayerDebugMode 1
CEP 11	defaults write com.adobe.CSXS.11 PlayerDebugMode 1

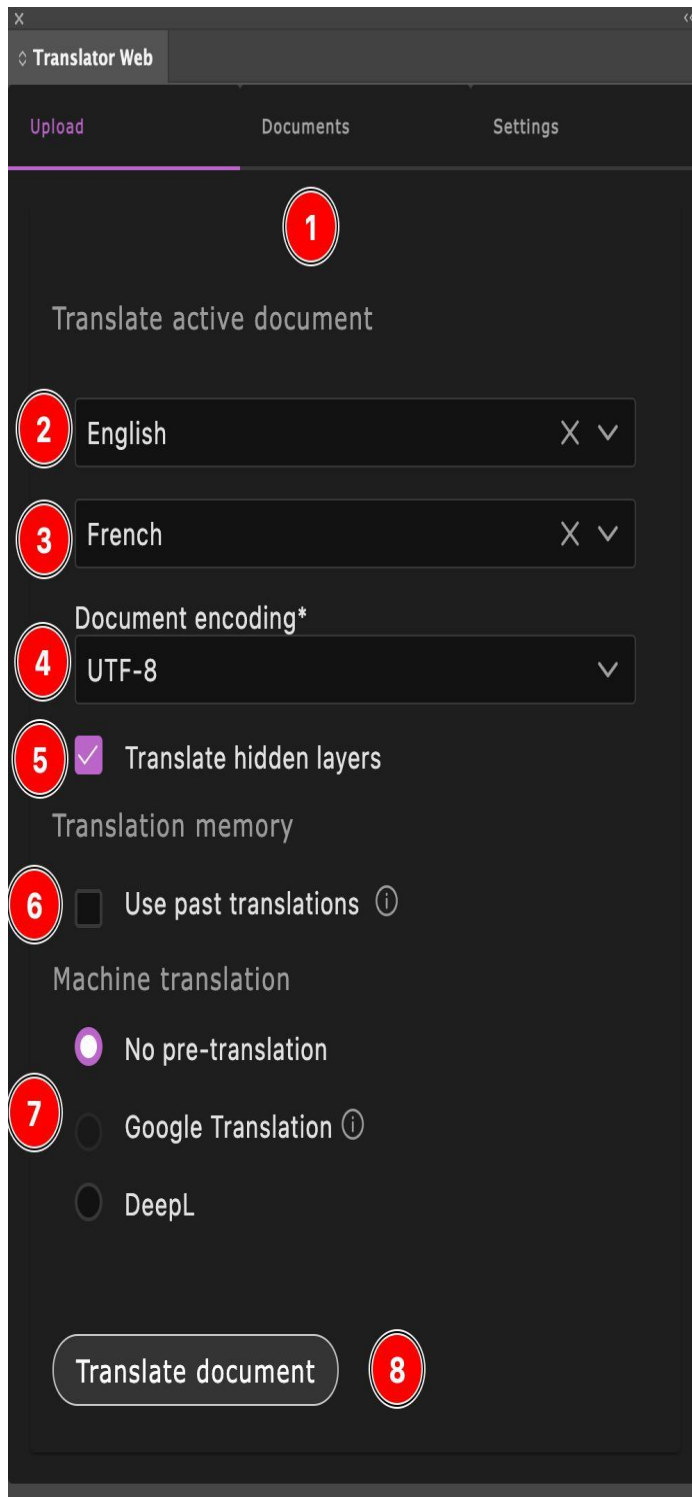

## How to use the plugin:

In order to exploit the plugin you should be a registered user in <https://mytranslator.online> , if you don't

have an account yet you can start by signing up and crediting your account.

After installing the plugin , it should be available under Window > Extensions.

## Upload Tab

1- The upload tab offers the possibility to automatically convert your active InDesign document to .idml, upload and translate it using the mytranslator.online service within InDesign.

2- Choose the active InDesign document language

3- Choose the desired translation language

4- Choose your document encoding ( default is UTF-8)

5- Decide whether or not to translate hidden layers

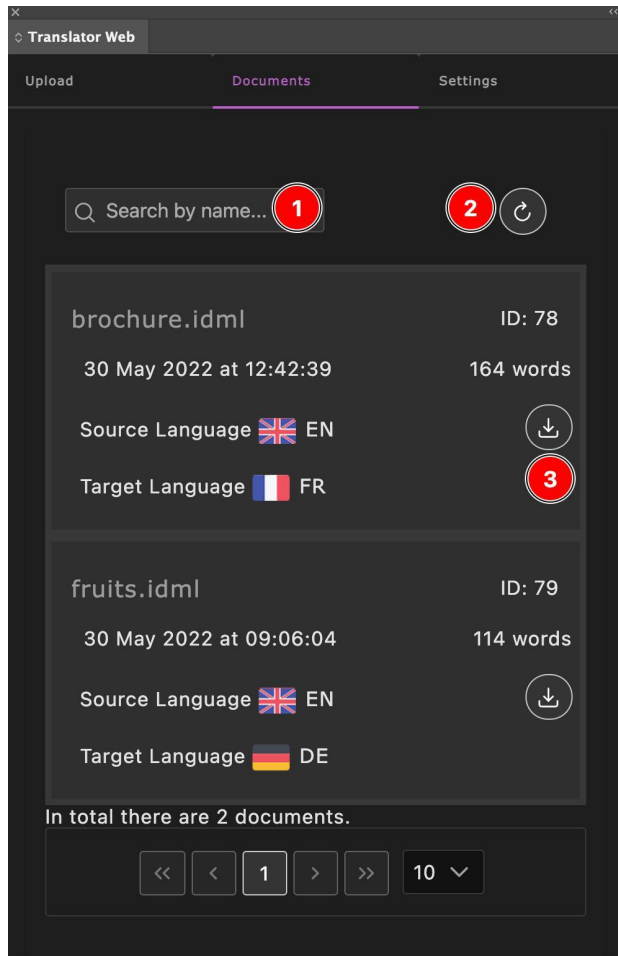

6- If you have entries in your translation memory activate this option to use the matches in the pre translation process.

7- Choose the translation machine engine.

8- click on "Translate document" , your document will be uploaded and translated depending on your preferences , check the "Documents" tab and hit refresh and you will find the translated file there when the process completes.

## Documents Tab

This tab show all the translated documents , you an easily search for a specific one by name , or download and automatically open a translated document in InDesign

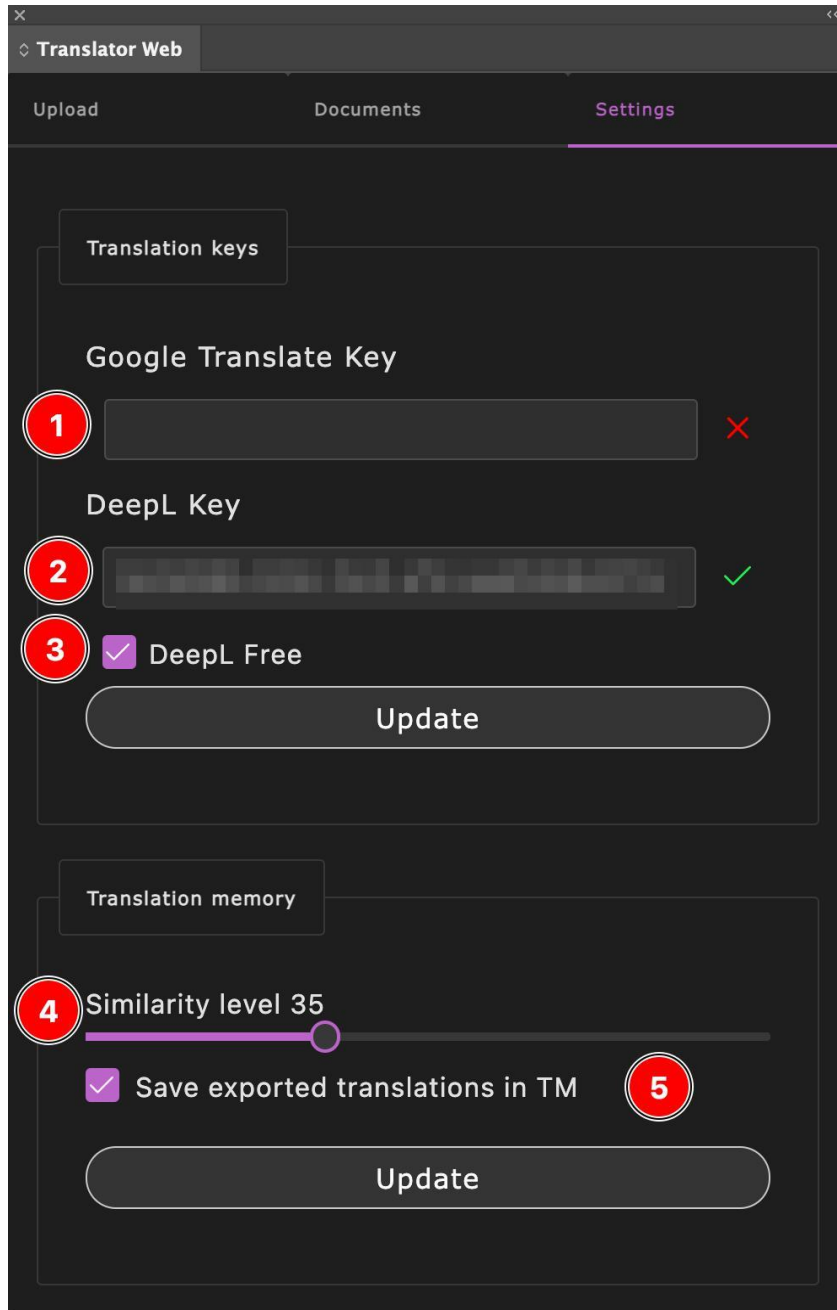

1- Search for translated documents by name

2- Click refresh to reload the table and see the newly uploaded document when the translation process finishes.

3- Automatically download and open the translated document in InDesign (downloaded files will be saved as IDML files under <user\_dir>/Documents

## Configuration Tab

In this tab you can configure your translation machine engines API keys and your translation memory options.

1-Enter your google translation API key ( how to get an api key <https://it-tun.com/how-to/> )

2- Enter your DeepL API key

3- Check if you're using the free version of DeepL API/

4- Select the minimum similarity level to use when pre translating using translation memory

5- Check to update the translation memory with the translated entries from the downloaded files.

If you followed everything and still can't get Translator to work, don't hesitate to contact us on "contact@it-tun.com" and specify "Translator Web Support" as subject so we can get back to you as soon as possible.
