

Getting a Google API key and configuring

You should register for an API key to use the plugin (The first 500,000 characters are free)

Create an account on <https://console.cloud.google.com>

Access : <https://console.cloud.google.com/cloud-resource-manager>

Click on the “Create Project” button

Manage resources + **CREATE PROJECT**

And then Choose a project name , when the project is created a new notification will appear , click on it to switch to the project page.

Click on APIs & Services ==> enabled APIs & services

The screenshot displays the Google Cloud console interface. At the top, the 'Google Cloud' logo is on the left, and a search bar contains the text 'translation-api'. Below the logo is a navigation menu with 'Cloud overview', 'Solutions', and 'PINNED PRODUCTS'. The 'APIs & Services' option is highlighted in the pinned products section. The main content area shows the 'DASHBOARD' for the 'translation-api' project. It includes a 'Project info' section with details like 'Project name: translation-api' and 'Project ID: translation-api-423216'. A dropdown menu is open over the 'Project info' section, listing options: 'Enabled APIs & services', 'Library', 'Credentials', 'OAuth consent screen', 'Page usage agreements', and 'Go to project settings'. Below this is the 'Resources' section, listing services like BigQuery, SQL, Compute Engine, Storage, and Cloud Functions. On the right, there is an 'API APIs' section with a line chart for 'Requests (requests/sec)'. The chart shows no data for the selected time frame. A notification banner at the bottom right states: 'Now viewing project "translation-api" in organization "No organization"'. The URL at the bottom of the page is 'https://console.cloud.google.com/apis/dashboard?project=translation-api-423216'.

On the Services page , click on the following button

+ ENABLE APIS AND SERVICES

Search for “Cloud translation API” , and select the first result

2 results
